

19/8/2017

Dear DSMT members,

Dear Angela,

Thank you for your letter it was inspiring as always, I really appreciate what you offer us and I am pleased to hear that you are revisiting in 2018, hope it will be good opportunity to talk with you individually.

In this end of year report I am going to inform you about my grades and accomplishments, easy going matters and hardships. As you realized from my end of first year report I have faced some obstacles; however second year was a turning point, it was the point of overcoming most of them which in return promoted my self confidence.

First semester was exciting so much that I loved university more than anything, courses were interesting, I moved to another dorm and made new friends, in brief things were going better, second semester was not as good as the first, courses were

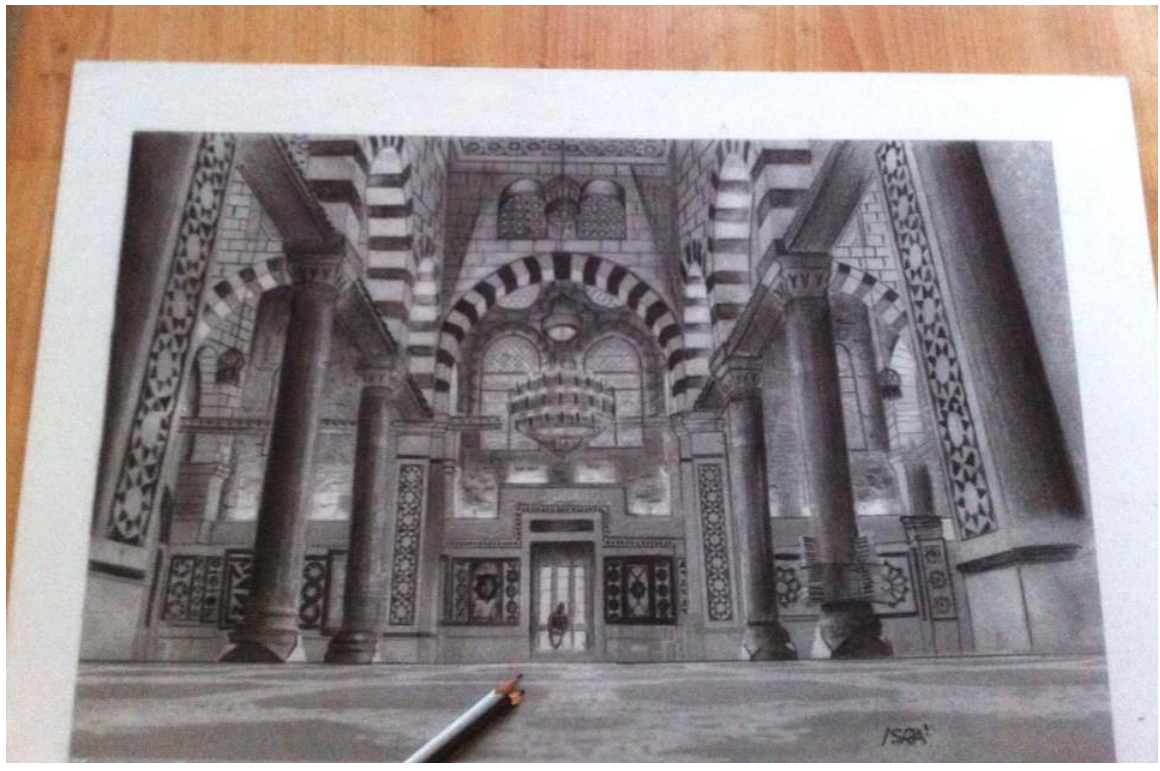

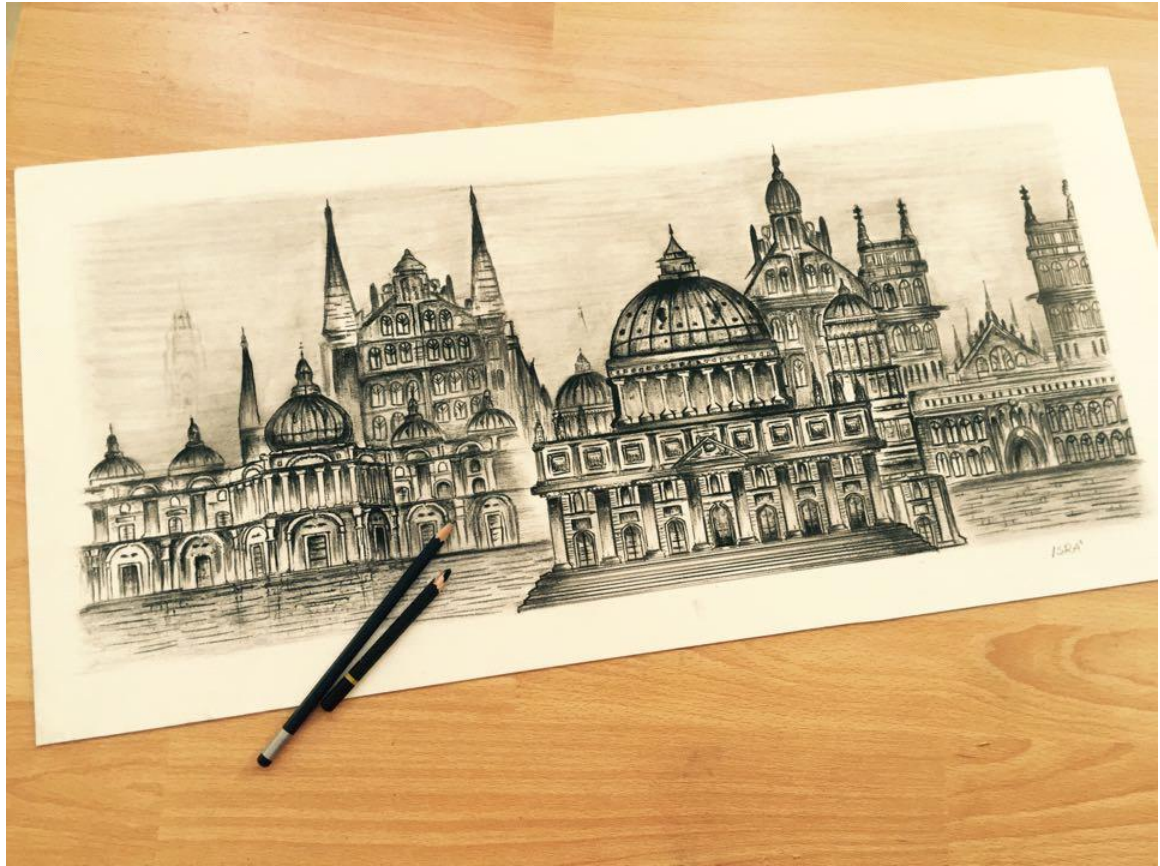

harder and some problems occurred in the dorm for example water cut off, but I could manage things in the end, summer course was the best among them there were an opportunity of joining voluntary work to help foreigners in their arabic studies and courses and there were more space for my social life.

الفصل الأول 2017/2016

	8	معدل الفصل: 3.31	
	79	المعدل التراكمي : 2.57	

The attached photo above reveals my grades for the second year including summer course. For my non

academic activities I participated Bicycle Tour twice as part of discovering palestine on bicycle. I also volunteered in helping foreigners with their arabic studies as I mentioned before.

I would like to share these last two photos with you, they were final drawings for history of architecture course.

In conclusion, "No pain no gain" I think this the best title of university life and thats for sure for my benefit.

yours sincerely

Israa Nasser Eddin
