The second year at Birzeit University was really good. It was full of pressure but I could pass it.

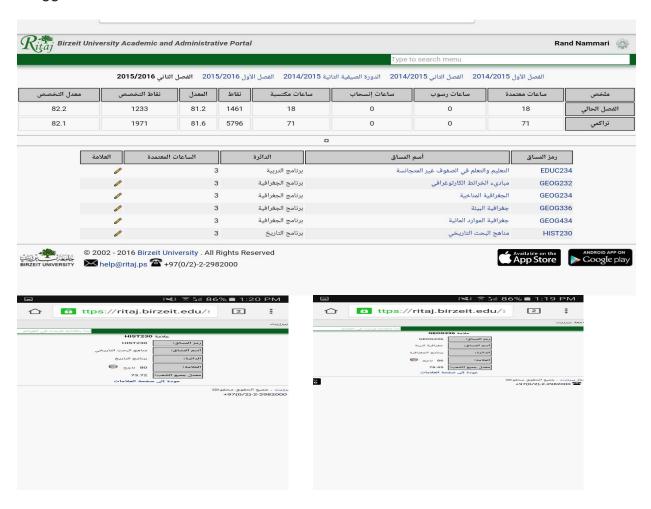

I have finished 71 certified hours with 81.6 averaged marks. The average of my specialist is 82.2

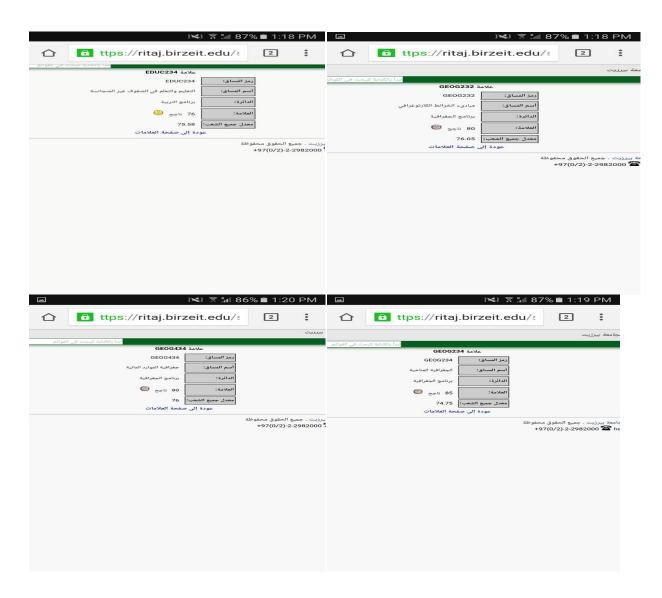

I also have an Education Diploma now. I got it because I think that if I want to change something I have to change it in conviction way, and that Diploma makes me able to talk to people and student and convince them in fewer words. Moreover, the Diploma makes me able to teach in schools if I wanted and that means that I can be a teacher. It is 30 certified hour and I have done 6 hours till now.

This year was not like the first, it is more difficult, hard, and full of events.

I know more about everything it is like I have grown-up!

I can see now that making difference in the world is not easy, I know that there is a big struggle waiting for me in every labor. But still there is big hope inside me to face the struggles.

I was social active this year more than before. I have participated in reading club with my mates. We were gathering our ideas and discuss them together so we can be more benefit to each other and reading books was full of knowledge and understanding. This is not counted as voluntary hours but I took part of it anyway.

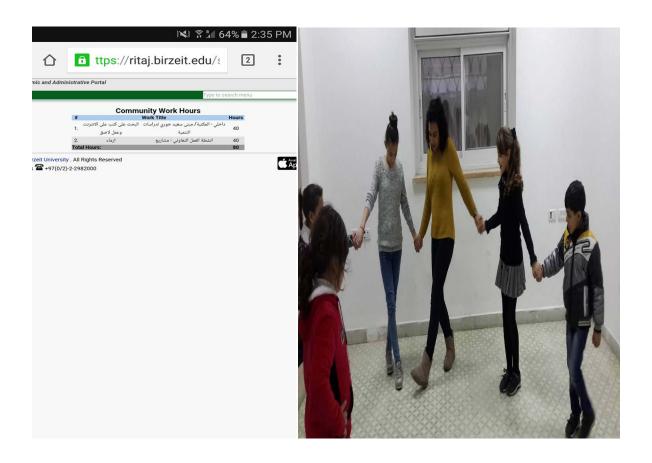

I took a role in a voluntary work in an organization and was counted as 40 community hour. I was playing with children and teach them Palestinian folklore dance Dabkeh. I was a part of the advertisers for Armaa organization, I told the people about it and courage them to be a partner in it.

My social life has expanded and gotten bigger than before. I have more friend and mates that I can be myself with them.

I also participated in group breakfast with the geography club and it was a really nice day.

Moreover, I contributed in the Palestinian Museum opening for two days, it is an agricultural and cultural museum which is the first kind in Palestine. I do not have enough photos because phones were forbidden to use.

I also went for a trip with the geography club to a nature preservation in Ain Qenia, Ramalla.

the museum opening

The geography breakfast group

Trip to the preservation

Some of my friends

work on the advertisement paper for Armaa

I will continue my third year at Birzeit University in my specialist Geography as major and History as minor and now the Diploma is something new that I will deal with and learn. I am still looking for an honor degree I tried to have it but I did not get it, but I will not stop until I earn it. I have gathered some ideas that I am going to discuss with geography club if it is possible to make it tangible, like sun cells and raising crops!

DSMT scholarship is the best ever! Knowing that not all the students are able to enter college is a sad thing, and I will finish my education so I can help other students to have higher education. Because I know that education is important but cannot continue without the scholarship, so I want to thank DSMT for giving me the chance of education.

Sincerely Yours, Rand Nammari
